Work Experiences

Full Stack Web Developer
Nov 2023 - Present
Sinar Baja Electric - Surabaya

Migrated multiple WordPress websites to modern Next.js applications, optimizing performance, SEO, and maintainability.
Utilized SSR, SSG, ISR, client/server components, dynamic routing, localization, and SEO tooling (Metadata API, JSON-LD, sitemap).
Built end-to-end type-safe systems with TypeScript, Node.js, Prisma, and MySQL, translated Figma designs into responsive interfaces, and managed domains, DNS, Cloudflare, SSL, and Node.js deployments.

Intern
Jul 2022 - Dec 2022
PT. Cross Network Indonesia

Developed a web-based scheduling and timeline reminder system using Django, HTML, CSS, and JavaScript. Led backend development within a 6-person team, responsible for database design, API logic, backend architecture, and middleware integration.

My Projects

- https://www.legacy.us.com/
- https://roadmaster.webdemosbe.xyz/

Education

Informatics - Artificial Intelligence
Jul 2019 - Jul 2023
Petra Christian University
CGPA: 3.75

Languange

Indonesia	English	Germany
Native	Intermediate	Beginner

Frontend & Frameworks

- Next.js (App Router)
- React
- TypeScript
- HTML, CSS, JS
- Responsive Website

Next.js & Web Performances

- Server-Side Rendering (SSR)
- Static Site Generation (SSG)
- Incremental Static Regeneration (ISR)
- Client & Server Components
- Route-based Code Splitting
- Dynamic Imports & Performance Optimization
- Internationalization (i18n / Localization)
- SEO Optimization (Metadata API, JSON-LD, Sitemap, Robots.txt)

Backend & Databases

- Node.js
- Prisma ORM
- MySQL
- REST APIs
- Backend Architecture Design

DevOps & Deployment

- Domain & DNS Management
- Cloudflare (Caching, SSL, CDN)
- CPanel Node.js Deployment
- SSL / HTTPS Configuration

Others

- Business Email Setup
- Figma to Code Conversion
- UI Implementation from Design Specs
